

New opportunities at Zapmap

Role Title: Senior DevOps Engineer

Reporting to: Head of DevOps

Location: Bristol Office, 2-3 days (+ Home Working)

Employee Referral Bounty Eligible

The Company

Zapmap is the UK's leading app and digital platform for electric vehicle (EV) drivers, enabling them to search for charge points, plan journeys, pay for charging and share insights with other drivers. Our mission is to make the EV charging experience simple, wherever you go and, by doing so, accelerate the transition to electric vehicles and zero-carbon mobility.

Zapmap's platform serves more than 350k monthly active users across its web and mobile products. We also provide research and insight, news and tools to support current (and prospective) EV drivers.

With over 10 years of industry experience and unique data sets, Zapmap offers a range of B2B services including promotion, content, data and market insights.

The Role

Zap-Map is looking for an experienced DevOps Engineer to join our established team to enhance our existing toolset and finalise the transition to a fully automated CI/CD pipeline. The successful candidate will leverage their expertise in AWS and Kubernetes as well as a strong foundational understanding of core system technologies (e.g. HTTP, Linux, Networking, Bash/Python) to enhance the visibility, reliability, and security of Zapmap's systems. Experience with Infrastructure as Code (IaC) and GitOps is highly desirable.

As a Senior DevOps Engineer, you will work within a small, agile team where you will have significant influence and the opportunity to engage with innovative projects and cutting-edge technologies. You will play a key role in the team, with ample opportunities for growth, and professional development actively encouraged and supported. You will be expected to take part in a weekly paid on call rotation to help maintain service levels.

Our Systems

Experience with the following technologies is beneficial, but a strong willingness and ability to learn new tools and frameworks is equally important.

- Cloud Providers: AWS, Digital Ocean, GCP
- Server OS: Rocky Linux, Amazon Linux
- IaC & Automation: Terraform, Kustomize, FluxCD, Jenkins
- Containerisation: Docker, Kubernetes
- Database & Monitoring: MySQL, Prometheus, Grafana
- Scripting: Python, Bash, PHP
- Operating Systems: Windows, iOS
- Compliance & Security: Cyber Essentials, ISO27001, PCI-DSS

Required attributes

- Adaptability and ability to thrive in a dynamic, fast-paced environment
- Self-motivated with the ability to work both independently and collaboratively
- Good written and verbal communication skills
- Commitment to accuracy, a logical approach, and attention to detail
- Interest in keeping up to date with current and emerging technologies

Our Offer

The EV market is growing at an extraordinary pace. Working at Zapmap means working in a dynamic and innovative organisation, where new ideas and developments need to be actioned and deployed quickly, with each day bringing new challenges. As one of the leading aggregator businesses in this space, you'll have the chance to actively contribute to a more sustainable future.

We believe that finding a candidate with the right attitude and aptitude for the role is more important than the hours worked or specific prior experience. So please get in contact if you feel that you would excel in this role, even if you don't tick every box on this job description or aren't able to work in a full-time capacity.

Your package includes:

- £60,000 - £70,000 base salary, depending on experience.
- Participation in paid on call policy.
- 10% annual performance related bonus with opportunity to exceed.
- Pension & benefits scheme.
- Access to salary sacrifice EV car scheme.
- Flexible working options available.
- Professional training and mentoring to extend your skills.

How to Apply

To formally apply, please send a covering email together with your CV to: jobs@zap-map.com. Direct applications only please, no CVs will be acknowledged or accepted from recruitment agencies.
